EDUCATION

Purdue University

Ph.D. in Computer Science

West Lafayette, IN, US

Aug. 2022 – May. 2027 (Anticipated)

GPA: 3.90/4.00, **Academic Advisor:** Prof. Elisa Bertino

Focus: Network Security

Sabancı University

M.Sc. in Computer Science and Engineering

Istanbul, Turkey

Sep. 2019 – Jan. 2022

GPA: 3.87/4.00, **Thesis Advisor:** Prof. Albert Levi

Thesis: Data Driven Intrusion Detection for 6LoWPAN Based IoT Systems

Sabancı University

B.Sc. in Computer Science and Engineering

Istanbul, Turkey

Sep. 2014 – June 2019

Minor in Mathematics

GPA: 3.86/4.00, **Ranked 3rd**

RESEARCH INTERESTS

Network security, cellular network security, protocol reverse engineering, IoT security and privacy, systems and software security, machine learning for security.

RESEARCH EXPERIENCE

Ph.D. Researcher

Purdue University - Computer Science

Aug. 2022 – Present

West Lafayette, IN, USA

- Developing methods to find vulnerabilities in cellular network security, specifically in Open Radio Access Networks (O-RAN), using large-scale language models and formal verification tools.
- Designing and curating large-scale testbeds and datasets for vulnerability analysis and detection in O-RAN.
- Analyzing the security and privacy of communication protocols, particularly unknown or proprietary protocols, using deep learning techniques.
- Developing models and tools to systematically infer protocol structures and behaviors to enhance security analysis, anomaly detection, and formal verification.
- Advisor: Prof. Elisa Bertino

Research Assistant

Purdue University - Electrical and Computer Engineering

Aug. 2025 – Present

West Lafayette, IN, USA

- Designing and implementing Rust-based asynchronous clients for sensor data acquisition and device communication over TCP for traffic speed deflectometer devices.
- Integrating new sensor systems into a modular, real-time pipeline using NATS JetStream and FlatBuffers for efficient data streaming and processing.
- Building frontend applications and APIs to visualize and manage roadway sensor data for the Indiana Department of Transportation (INDOT).
- Supervisor: Prof. James V. Krogmeier

Research Assistant – Technical Team Lead

Purdue University - OATS, IoT4Ag, Agricultural and Biological Engineering

June 2025 – Aug. 2025

West Lafayette, IN, USA

- Installed and configured LoRaWAN-based soil and weather sensors, including the deployment of various LoRaWAN gateways as part of the SPRING (Solar-Powered Remote IoT4Ag Network Gateway) inventory.
- Implemented communication interfaces, sensor data decoding logic in Chirpstack, RedPanda Connect flows, TimescaleDB tables, and Grafana dashboards for data pipelining and visualization.
- Built a public-facing dashboard to visualize real-time sensor data and deliver interactive learning content for students, teachers, and the public.

- Collaborated in weekly meetings, shared technical design decisions, and co-developed lecture material, visuals and tutorials that demystify IoT systems for middle-school students.

Research Intern

Purdue University - GoBoiler Internship Program (Selected Attendee)

June 2020 – June 2021

West Lafayette, IN, USA

- Implemented a secure and robust context-based group pairing scheme for heterogeneous IoT devices.
- Accepted to IEEE S&P (Oakland) 2023, second cycle.
- Supervisor: Dr. Z. Berkay Celik

Summer Research Intern

Technical University of Berlin

June 2018 – Sep. 2018

Berlin, Germany

- Implemented deep learning models to optimize the bitrate selection decision on DASH clients.
- Reviewed the literature and delivered an overview presentation on Dynamic Streaming over HTTP (DASH).
- Attended M.Sc. lectures and seminars with the focus on content delivery techniques.
- Supervisors: Dr. Suzan Bayhan and Prof. Abdel-Karim Al-Tamimi

PEER-REVIEWED PUBLICATIONS

- Habiba Farrukh*, Muslum Ozgur Ozmen*, **Faik Kerem Ors**, Z. Berkay Celik. One Key to Rule Them All: Secure Group Pairing for Heterogeneous IoT Devices. In *IEEE Security and Privacy (S&P '23)*. – **Cited by 27**
- **Faik Kerem Ors**, and Albert Levi. Data driven intrusion detection for 6LoWPAN based IoT systems. In *Ad Hoc Networks*, 143, pages 103-120, April 2023. – **Cited by 14**
- **Faik Kerem Ors**. Data Driven Intrusion Detection for 6LoWPAN Based IoT Systems. *M.Sc. Thesis*, December 2021.
- **Faik Kerem Ors**, Mustafa Aydin, Aysu Bogatarkan, and Albert Levi. Scalable Wi-Fi Intrusion Detection for IoT Systems. In *11th IFIP International Conference on New Technologies, Mobility and Security (Security Track)*, Paris, France, April 2021. – **Cited by 9**
- **Faik Kerem Ors**, Suveyda Yeniterzi, and Reyyan Yeniterzi. Event Clustering within News Articles, In *Proceedings of the Workshop on Automated Extraction of Socio-political Events from News 2020*, pages 63–68, Marseille, France, May 2020. European Language Resources Association (ELRA). (Proposed system ranked 1st in the shared task). – **Cited by 28**

CONFERENCE PRESENTATIONS

- Scalable Wi-Fi Intrusion Detection for IoT Systems. In *11th IFIP International Conference on New Technologies, Mobility and Security (Security Track)*, Paris, France, April 2021.
- Event Clustering within News Articles, In *Proceedings of the Workshop on Automated Extraction of Socio-political Events from News 2020*, pages 63–68, Marseille, France, May 2020. European Language Resources Association (ELRA).

TEACHING EXPERIENCE

Teaching Assistant

Purdue University

Aug. 2022 – May 2025

West Lafayette, IN, US

- Held office hours, supervised student projects, designed and graded exams and assignments.
- Courses (reverse chronological): Computer Security (CS 426; Spring 2025, Fall 2023, Spring 2023), Cryptography (CS 555; Fall 2024), Information Security (CS 526; Spring 2024), Security Analytics (CS 529; Fall 2022)

Guest Lecturer

CS 426, Purdue University

Fall 2023

West Lafayette, IN, US

- Gave lectures on buffer overflows, return oriented programming, SQL injection, and cross-site scripting.

Teaching Assistant

Sabanci University

Feb. 2018 – Jan. 2022

Istanbul, Turkey

- Held office hours, designed and graded assignments, conducted lab sessions and supervised student projects.
- Courses (reverse chronological): Computer Networks (CS 408; 2022, 2021, 2020), Computer and Network Security (CS 432), Machine Learning (CS 412), Advanced Programming (CS 204), Database Systems (CS 306)

SERVICES

- External Reviewer in NDSS 2026, 2025, 2024
- External Reviewer in IEEE S&P 2026, 2024
- External Reviewer in USENIX Security 2024
- Reviewer in IEEE Transactions on Information Forensics and Security (TIFS) 2024
- Reviewer in ITU Journal on Future and Evolving Technologies (ITU J-FET) 2022
- Reviewer in IEEE International Conference on Communications (ICC) 2022
- Reviewer in IEEE Conference on Communications and Network Security (CNS) 2021
- Reviewer in The Computer Journal (Oxford University Press) 2021, 2020

HONORS AND AWARDS

- Graduate Teaching Award in Recognition of the Teaching Performance during Spring 2025 (November 2025).
- Tuition waiver and Graduate Teaching Assistantship offer by Purdue University for graduate studies (2022 – 2027).
- Full tuition waiver and stipend by Sabancı University for graduate studies (2019 – 2021).
- Dean’s High Honor List, Sabancı University (2016 – 2019).
- Recipient of Sakip Sabancı Encouragement Scholarship, which covers 100% of tuition fee, because of academic excellence (2016 – 2019).

TECHNICAL SKILLS

Programming Languages: Python, C++, C, C#, Java, SQL

Frameworks and Libraries: PyTorch, Tensorflow, Pandas, NumPy, Scikit-learn, Keras, Flask, Django

Operating Systems: Unix, Linux, macOS, Windows

Technologies: git, MySQL, PostgreSQL, Docker, JUnit, Android Studio, Chirpstack, Redpanda Connect, Grafana

Tools: Wireshark, Metasploit, Hashcat, Burp Suite, Nmap, SQLmap, Wfuzz, IDA, Binwalk, The Harvester, Dirbuster

ADDITIONAL WORK EXPERIENCE

R&D Engineer

PRODAFT

Feb. 2019 – Aug. 2019

Istanbul, Turkey

- Implemented a machine learning based phishing detection system from scratch.
- Developed RESTful microservices to be integrated into the threat intelligence ecosystem of the company.

Security Research Intern

PRODAFT

July 2017 – Sep. 2017

Istanbul, Turkey

- Worked on penetration testing and developed penetration testing tools in Python.
